Thanks Meredith. Have you indicated yet to registrants when they have to have revised labelling in place?

Marion

Subject: "Final" Neonic label language

Hi Marion:

Please find attached our "final" bee labeling for the neonicotinoid products. We are sending it to the main companies (Bayer, Syngenta, Mitsui and Valent) today for a quick look, and are asking for their thoughts by COB Monday.

As before, there are 2 documents, one is the Pollinator Protection Box, the other is the text for the Directions for Use.

Have a nice weekend -

Meredith
